

External continuous flow gas hot water heater

HOT WATER

24/7

Hot Water 24/7

Never ending hot water, 24 hours a day, whenever you turn on the tap. That's the promise we provide you with our range of Eternity G series, 5 & 6 star energy efficient gas water heaters.

21st Century technology

Whether operated through a Chromagen mixing valve, or matched with our optional digital control touch pads, the Eternity G series range of continuous flow gas water heaters are able to provide enough temperature controlled hot water to service up to three bathrooms.

Once set, your hot water remains at a constant temperature with no need for mixing cold water. This means both convenience and safety for your family, particularly for young children and the elderly.

Energy Efficiency up to 6 Stars

Your new Eternity G series not only has energy efficiency ratings up to an amazing 6 Stars, it only uses purchased energy when required, as it only heats the water when you need it. This adds up to substantial savings when compared to those old money guzzling storage systems that require a pilot light. No more money going up in flames. With the Eternity touch pad option, you control the water temperature and subsequently control your savings and reduce your gas bill.

New 'Hot Flow' technology

Your new Eternity Pure6 system not only comes standard with a 6 Star energy efficiency rating, it's been specifically

- 10 year heat exchanger warranty
- 3 years on all parts and labour
- Up to 6 Stars energy rating
- Continuous hot water flow

Specifications/Models	G20	G26	G26 Pure6

Gas types	NG / LPG	NG / LPG	NG / LPG
Energy Rating	5.2	5.8	6
Colour	Beige		

designed to minimize gas, water & electricity wastage as well. Your new Eternity Pure6 utilizes 'hot flow' technology that pre heats the water before sending it to your taps. And when you're not using your system, internal sensors place the electronics into a low wattage standby mode so you're not wasting electricity.

World class customer care

Your Eternity G series is backed up with a comprehensive customer service network, all of whom are just a phone call away. All our domestic systems are covered by a 10 year heat exchanger warranty and three years on all parts and labour. For further information on our customer protection plan, we always recommend you read the comprehensive information manual we supply with every Eternity G series system.

(Chromagen's commercial warranty applies for commercial applications)

Safety and reliability is our priority

Your compact new Eternity G series is provided with full flame protection for total peace of mind. Plus, with our ingenious temperature sensing technology, your Eternity G series is able to protect itself from damage in frost prone areas.

Your local Chromagen representative is able to provide expert advice on the correct Eternity G series system for your needs.

Eternity G series touch pad controllers

Your new Eternity G Series Gas water heater can be fitted with optional controllers to allow you to set your own preferred water temperature and allows you to take full advantage of the technological features inbuilt in your new system. Just some of the reasons for installing at least one Eternity controller are –

- Child safety. With preset temperatures at all taps, your children will be safe from being scalded by hot water, as will the elderly.

- They're simple to use. In no time, your family will be tailoring your water controllers to suit each individual's needs.
- With your shower preset to your desired temperature, you don't have to worry about those 'cold shocks' in the shower when someone turns on another hot water tap, or a spike in temperature if someone flushes the loo.
- You'll be saving water, as there's no need to 'jiggle' the hot and cold taps to attain your desired temperature – simply turn on the hot water tap and enjoy.

Eternity G20 & G26 controllers

Main controller

The controller is installed in the kitchen to allow temperature control through out the home when higher temperatures are required for dish washing the temperature can be controlled by the touch of a button. This feature saves energy and water as no mixing of cold and hot water is required to obtain the desired temperature.

Shower controller

This advanced feature enables you to simply key in the temperature you want. Once selected simply turn on the hot tap and you'll have endless hot water at your desired temperature.

Ensuite controller

Usually located in an ensuite or second bathroom this controller enables you to key in the desired temperature in this room. Simply key in the desired temperature and turn on the hot tap.

Eternity G26 Pure 6 controllers

Eternity recess box

Building a new home or renovating? Why not allow for an Eternity recess box to be included during construction. Fitting a recess box allows your new Eternity Series to be installed into the cavity of the wall, providing an aesthetic installation and saving valuable space.

An Eternity recess box suits all Eternity Series models to enable your new system to be installed almost flush with the wall. A standard feature is a lower cover to conceal the plumbing, gas & electrical lines going to and from the system. All recess boxes are galvanised for long life and easy painting to match the exterior of your home.
